

Prakhar shukla

Web Developer

EXPERIENCE & PROJECTS

- While I am a fresher in the field, I have gained practical experience through personal projects and coursework, where I have applied my skills to develop web applications and explore various technologies. Some of my notable projects include:
- News Website: Developed a news website using HTML, CSS, JavaScript, and React, integrating it with the News API for real-time article updates. Utilized React's modular approach for scalability and employed Axios for seamless API requests. Implemented responsive design with CSS3 for cross-device compatibility. Collaborated within a team to brainstorm, troubleshoot, and enhance features. Ensured data security through API key management. Resulted in a functional website delivering current news articles from diverse sources, enhancing user engagement.
- Developed a song app using HTML, CSS, and JavaScript. Designed a user-friendly interface with HTML and styled it using CSS. Integrated audio playback functionality and interactive features such as play, pause, and skip using JavaScript. Created a functional and visually appealing app for users to enjoy music.
- Crafted multiple engaging projects showcasing proficiency in HTML, CSS, and JavaScript, including a password generator, notes app, to-do list, Amazon UX prototype, and text converter. Demonstrated adeptness in front-end development, UI/UX design, and problem-solving skills, contributing to a diverse portfolio of innovative web applications.

Key Skills and Attributes:

- Adaptability: Capable of quickly learning new technologies and frameworks to meet project requirements and industry demands.
- Problem-solving: Proficient in identifying and resolving technical challenges, ensuring smooth project execution and delivery.
- Collaboration: Effective team player with strong communication skills, capable of collaborating with cross-functional teams to achieve project goals.
- Innovation: Forward-thinking approach to incorporating AI-driven solutions for productivity enhancements and optimizing web development processes.
- Attention to Detail: Meticulous in writing clean, efficient code and adhering to best practices to ensure high-quality deliverables.

ABOUT ME

As a fresher student with a diverse skill set in web development, I bring proficiency in a range of programming languages and technologies essential for creating modern web applications. With expertise in React, JavaScript, HTML, CSS, Python, and Bootstrap, I am well-equipped to contribute effectively to front-end and back-end development projects. Additionally, my knowledge extends to leveraging artificial intelligence (AI) tools for productivity enhancements, allowing me to streamline processes and innovate within web development workflows.
