Summary

As a fresher with a diverse skill set in web development, I bring proficiency in various programming languages and technologies essential for creating modern web applications. My expertise in React, JavaScript, HTML, CSS, Python, and Bootstrap enables me to contribute effectively to both front-end and back-end development projects. Additionally, I have experience leveraging artificial intelligence (AI) tools to enhance productivity, streamline processes, and drive innovation within web development workflows.

Projects

BEATS

Developed a sleek song app with HTML, CSS, and JavaScript, featuring intuitive audio controls for play, pause, and skip, enhancing user enjoyment.

<https://prakhar5238.github.io/>

Figma

Designed a Gatekeeper app in Figma, focusing on intuitive navigation, secure access controls, and a user-friendly interface for seamless gate management.
